

Switches

LANCOM GS-4554XP

Stackable full-layer 3 PoE+ access switch for large, demanding infrastructures

This fully managed access switch with Power over Ethernet and full layer 3 functions is the ideal solution for demanding infrastructures in enterprise environments. With its extensive industry-standard port equipment, it offers enormous performance even at high workloads and enables uplinking and stacking. Professional redundancy functions and LANCOM fail-safe stacking guarantee fail-safe operation with the best protection covered by the Limited Lifetime Warranty (LLW). Orchestrated via the LANCOM Management Cloud (LMC), its configuration is automated.

- Multi-Gigabit Access Switch with 12x 2.5 multi-Gigabit Ethernet ports, 36x 1 Gigabit Ethernet ports, 4x SFP+, and 2 QSFP+ ports
- IEEE 802.3af/at PoE+ support to efficiently power connected devices at 820 watts (1,440 watts with second PSU)
- Full layer 3 functionality with policy-based dynamic routing and DHCP server function
- Backplane stacking optionally (SW-defined) via SFP+ or QSFP+ ports
- 1x hot-swappable PSU plus separate bay for adding a second PSU
- 2x fixed, redundant fans (N+1)
- Front-to-back ventilation design for optimal cooling in 19" racks
- Cloud-managed LAN and switch stacking for quick configuration and convenient management via the LMC
- IPv6 and IPv4 support for modern enterprise networks
- Includes security updates for 5 years after end of sale and major releases for 2 years after end of sale
- Limited Lifetime Warranty (LLW) included

LANCOM GS-4554XP

High power output on 54 ports

The LANCOM GS-4554XP is equipped with 12x 2.5 multi-Gigabit PoE+ Ethernet ports, 36x Gigabit PoE+ Ethernet ports, as well as 4 SFP+ and 2 QSFP+ ports supporting transmission rates of 10 and 40 Gbps respectively. In addition, with a data throughput of 372 Gbps on the backplane, it offers wirespeed performance even at high workloads. The multi-Gigabit access switch thus forms the powerful basis for modern network infrastructures in all industries and areas of application.

A high-performance basis for Wi-Fi 6 – PoE included

Thanks to 12 high-performance 2.5 Gigabit Ethernet ports, the LANCOM GS-4554XP is the ideal LAN-side basis for integrating the new wireless LAN standard Wi-Fi 6 into modern infrastructures. The increased data rates when using Wi-Fi 6 require 2.5 Gigabit Ethernet, as the required performance demands exceed those of a simple Gigabit Ethernet port. This switch in combination with the corresponding PoE power thus enables the operation of up to 12 Wi-Fi 6 access points or other network components with high performance requirements – without additional electrical installation.

Central power supply without additional electrical installation

As a powerful PoE switch, the LANCOM GS-4554XP supplies connected PoE end devices without additional power supplies or power cabling. It supports the Power over Ethernet standards IEEE 802.3af (PoE) and IEEE 802.3at (PoE+) with up to 30 watts per port. Thanks to high power reserves, a PoE budget of 1,440 watts is available when using both power supplies in power mode, making it ideal for efficiently powering PoE end devices with high energy requirements.

LANCOM fail-safe stacking

LANCOM fail-safe stacking allows up to 8 physical switches to be combined into one logical unit for convenient maintenance and management – at a single site or even distributed across different sites. Via the nonstop forwarding function, the stack manager cyclically supplies its standby with current information such as the MAC table and its own status information. In the event of a failure, the standby manager is able to take over without noticeable network interruption via the hitless failover function. Subsequent expansion of the network is also possible, as the new switch receives its configuration automatically from the stack manager and is ready for use within seconds. The stacking function can also be activated on both the front SFP+ uplink ports and the rear QSFP+ uplink ports, enabling a mixed stack with the LANCOM XS-5110F and XS-5116QF aggregation switches.

Full control over your investment

Fully equipped ex works, ready for immediate use, everything from a single source: In accordance with the principle of "Total Cost of Ownership" (TCO), the LANCOM GS-4554XP gives you planning security from the very beginning and at all times with regard to the acquisition costs for your network expansion. The full expansion with all necessary ports in the industry standard makes time-consuming and costly retrofitting of proprietary port modules a thing of the past. Furthermore, our accessories portfolio provides you with the necessary SFP modules and direct attach cables directly from us in tested LANCOM quality. In addition to the guarantee of maximum operational reliability through extensive load and long-term tests of the modules, you also avoid long delivery times.

LANCOM GS-4554XP

Static routing for fast data exchange

The LANCOM GS-4554XP is full layer 3 capable with policy-based dynamic routing via OSPF, providing dynamic network routes through one or more network segments. This provides tremendous increase in network efficiency for example in meshed networks with multiple aggregation switches at different locations.

Hardware redundancy

The LANCOM GS-4554XP with a "hot-swappable" PSU (power supply unit) allows the power supply to be replaced quickly and without interruption in the event of a defect. A separate plug-in module allows the addition of a second PSU. With the integration of two redundant power supply units, for example, highly fail-safe scenarios can be realized or the PoE power can be bundled and thus doubled. In addition, the redundant (N+1) fan concept also ensures fail-safe switch operation in case one of the two fans fails.

Front-to-back ventilation design

The LANCOM GS-4554XP protects your investment with an innovative front-to-back ventilation design. This enables optimal cooling even in 19" racks and maximizes the lifetime of the device.

Cloud-managed LAN and switch stacking

With the LANCOM Management Cloud, the LANCOM GS-4554XP offers fast and easy network integration as well as automatic configuration assignment. Cloud-managed LAN replaces individual device configuration with holistic network orchestration and enables automatic VLAN assignment to the desired switch ports. Configurations can be rolled out or updated simultaneously at the click of a mouse and even more complex networking scenarios easy to administer. When using the LANCOM GS-4554XP in a stack, Cloud-managed switch stacking also ensures convenient management and monitoring of the entire stack. The cloud

independently detects which and how many switches belong to the stack. Learn more about professional network connectivity and configuration in the Design guide switch stacking.

Secure remote management

Secure communication protocols such as SSH, SSL and SNMPv3 mean that the LANCOM GS-4554XP is ideal for professional remote network management. The switch also supports the TACACS+ protocol for authentication, authorization, and accounting. This optimized solution promises maximum security for multi-site network management and monitoring.

Limited Lifetime Warranty (LLW)

This enterprise switch is covered ex works by the LANCOM Limited Lifetime Warranty. Regardless of the operating time, the warranty is valid until the end-of-life status of the device (max. 10 years). For next-business-day delivery of a replacement device, we recommend the LANCOM Next Business Day Replacement Option and the LANCOM Service Packs in the 24/7 or 10/5 variants. The Service Packs also offer professional end customers manufacturer support with customized service times.

LANCOM GS-4554XP

Security

Secure Shell Protocol (SSH)	SSH for a secure remote configuration
Secure Sockets Layer (SSL)	SSL to encrypt HTTP connections; advanced security for browser-based configuration via web interface
IEEE 802.1X	IEEE 802.1X access control on all ports; RADIUS for authentication, authorization and accounting with MD5 hashing; guest VLAN; dynamic VLAN assignment
Private VLAN edge	Layer 2 isolation between clients in the same VLAN ("protected ports"); support multiple uplinks
Port security	Locking of MAC addresses to ports; limiting of the number of learned MAC addresses
IP source guard	Blocking access for illegal IP addresses on specific ports
Access-control-lists	Drop or rate limitation of connections based on source and destination MAC addresses, VLAN ID, IP address (IPv4/IPv6), protocol, port, DSCP/IP precedence, TCP/UDP source and destination ports, IEEE 802.1p priority, ICMP packets, IGMP packets, TCP flag. Support of 1023 ACEs per ACL and up to 16384 entries in total.
RADIUS/TACACS+	Authentication, authorization and accounting of configuration changes by RADIUS or TACACS+
Storm Control	Multicast/Broadcast/Unicast storm suppression
Isolated Group	Allows certain ports to be designated as protected. All other ports are non-isolated. Traffic between isolated group members is blocked. Traffic can only be sent from isolated group to non-isolated group.
DHCP Snooping	Protection against rogue DHCP servers on the network - Outgoing DHCP-server packets are only allowed on specific ports.
Dynamic ARP Inspection	Dynamic ARP Inspection to prevent man-in-the-middle attacks incl. proxy ARP
ARP Request Poisoning	Protection against ARP Request Poisoning (ARP Spoofing)
Denial-of-Service	Protection against Denial-of-Service attacks to prevent the loss of important protocol functions

Performance

Switching technology	Store and forward with latency less than 4 microseconds
MAC addresses	Support of max 32K MAC addresses
Throughput	Max. 372 Gbps on the backplane
Maximum packet processing	277 million packets per second (mpps) at 64-byte packets
VLAN	Port based and IEEE 802.1q tag based VLAN with up to 4,096 VLAN and up to 4,000 active VLANs; Supports ingress and egress packet filter in port based VLAN
Jumbo frame support	Jumbo frame support with up to 12288 bytes
Packet Buffer	4 MB

PoE with IEEE 802.3at

Power	820 W total power with dynamic load balancing on all ports (optional up to 1440 W with second power supply unit)
Priorisation	Supports port based priority and PoE status setting
Status information	Monitoring via LED, displaying the actual power consumption per port in web interface

Energy efficiency (Green Ethernet)

Energy detection	Energy efficiency according to IEEE 802.3az. Automatically turns off power on Gigabit Ethernet RJ-45 port when detecting link down or Idle of client. Active mode is resumed without loss of any packets when the switch detects the link up
Cable length detection	Adjusts the signal strength based on the cable length. Reduces the power consumption for short cable

Layer 3 features

Number of L3 interfaces	up to 128
Static routing (IPv4/IPv6)	Hardware based static routing (IPv4/IPv6) with a number of 16,000 possible routes
DHCP Server	DHCP Server per VLAN
VRRP	Virtual Router Redundancy Protocol
Dynamic routing (IPv4/IPv6)	dynamic routing by OSPFv2 and OSPFv3

LANCOM GS-4554XP

Layer 2 switching	
Spanning Tree Protokoll (STP) / Rapid STP / Multiple STP	Standard Spanning Tree according to IEEE 802.1d with fast convergence support of IEEE 802.1w (RSTP); using Multiple Spanning Tree instances by default according to IEEE 802.1s (MSTP)
Link Aggregation Control Protocol (LACP)	Support of 64 groups containing up to 8 ports each according to IEEE 802.3ad
VLAN	Support for up to 4K VLANs simultaneously (out of 4096 VLAN IDs); matching due to port, IEEE 802.1q tagged VLANs, MAC addresses, IP subnet and Private VLAN Edge function ("protected ports")
Voice VLAN	Voice traffic is automatically assigned to a voice-specific VLAN and treated with appropriate levels of QoS
IGMP multicasts	IGMP v1, v2, v3 to limit bandwidth-intensive multicast traffic to ports with requesters; supports 1024 multicast groups; source-specific multicasting
IGMP querier	Support of multicast domains of snooping switches in the absence of a multicast router
IGMP proxy	IGMP proxy to pass IGMP messages through
MLD v1/v2	Multicast Listener Discovery - IPv6 multicast packets are transmitted to interested listeners only
Generic VLAN registration	VLAN registration with GVRP according to IEEE 802.1q for automatic delivery of VLANs in bridged domains
DHCP Relay Agent	Relay of DHCP broadcast request to different LANs
Supported DHCP options	all options listed in RFC2132
Stacking	
Stacking Option	Stacking via SFP+ uplink (10G) or QSFP+ uplink ports (40G)
Interfaces	
Ethernet	> 12 TP ports 100/1000/2500 Mbps > 36 TP ports 10/100/1000 Mbps > 4 SFP+ ports 1/10 Gbps > 2 QSFP+ Uplink or Stacking ports 40 GBit/s > 54 concurrent Ethernet ports in total
Console port	Micro-USB and RJ45 configuration port for command line access
Out of band management port	Out of band management RJ45 configuration port for command line access via terminal server
Management and monitoring	
Management	LANconfig, WEBconfig, LANCOM Management Cloud, Industry Standard CLI
Command Line Interface (CLI)	Configuration and status display from the command line with console application and direct connection to console port, via Telnet or SSH
Monitoring	LANmonitor, LANCOM Management Cloud
Remote Monitoring	Integrated RMON software agent supports 4 RMON groups (history, statistics, alarms and events) for enhanced traffic management, monitoring and analysis
Port Mirroring	Traffic can be mirrored from on port to another for investigation with network analyzer or RMON probe. Up to 51 ports can be mirrored to a single mirror port. Single sessions can be selected
Security	Access rights (read/write) can be set up separately, access control list
SNMP	SNMP management via SNMPv1, v2c or v3 with support of traps. User-based security model for SNMPv3 (USM)
Diagnosis	Diagnosis from the switch with PING and cable diagnosis
Firmware update	> Update via WEBconfig and browser (HTTP/HTTPS) > Update via TFTP, SCP, and LANconfig > Update via LANCOM Management Cloud > Dual firmware image to update during operation
Secure Copy	Securely import and export files
DHCP client	Automatic assignment of the management IP address by DHCP
SNTP	Automatic time settings with Simple Network Time Protocol (SNTP)

LANCOM GS-4554XP

Management and monitoring

s-flow v5	Standard for monitoring of high-speed-networks. Visualization of network use, accounting an analysis to protect your network against dangers
-----------	--

Hardware

Weight	13,89 lbs (6,3 kg)
Power supply	Two bays for swappable power supply units (100 – 240 V, 50 – 60 Hz)
Environment	Temperature range 0 – 40° C; short term temperature conditions 0 – 50°C; humidity 10 – 90%; non-condensing
Housing	Robust metal housing, 19" 1U (442 x 44 x 440 mm > W x H x D) with removable mounting brackets, network connectors on the front
Fans	3 (4 when using 2 PSUs) redundant, but not hot swappable
Power consumption (max) without powered devices	> 90 W (when using one PSU, or two PSUs in redundancy mode) > 150 W (when using two PSUs in boost mode)
Power consumption (max) at full PoE power delivery	> 910 W (when using one PSU, or two PSUs in redundancy mode) > 1650 W (when using two PSUs in boost mode)
Power consumption (idle)	84 W
Acoustic noise (typ.)	60 dBA
Heat power (max)	715 BTU/h

Software

LCOS version	based on LCOS SX 5.00
Software Lifecycle Management	After discontinuation, the device is subject to the LANCOM Software Lifecycle Management. Details can be found at: www.lancom.de/lifecycle
Anti-backdoor policy	Products from LANCOM are free of hidden access paths (backdoors) and other undesirable features for introducing, extracting or manipulating data. The trust seal "IT Security made in Germany" (ITS MIG) and certification by the German Federal Office for Information Security (BSI) confirm the trustworthiness and the outstanding level of security

Supported RFC standards	
RFC 4291	IP Version 6 Addressing Architecture
RFC 4443	Internet Control Message Protocol (ICMPv6)
RFC 4668	RADIUS Authentication Client MIB
RFC 4670	RADIUS Accounting MIB
RFC 5519	Multicast Group Membership Discovery MIB
Scope of delivery	
Manual	Hardware Quick Reference (DE/EN), Installation Guide (DE/EN)
Cable	Serial configuration cable, 1.5m
Cable	Micro-USB configuration cable, 1.0m
Cable	IEC power cord
Power supply	1x swappable PSU (expandable up to 2 PSUs for redundancy / higher PoE budget)
19" brackets	Two 19" brackets for rackmounting
Support	
Warranty	LANCOM Limited Lifetime Warranty – Hardware warranty until the End of Life status of the device (maximum 10 years). For details, please refer to the General Warranty Conditions at: www.lancom.de/garantiebedingungen .
LANCOM support	➤ Free technical manufacturer support for LANcommunity partners as part of the LANCOM Software Lifecycle Management www.lancom.de/lifecycle ➤ Charged technical manufacturer support for end customers is optionally available
LANCOM Warranty Advanced Option XL	Replacement of a defective device within 5 years after purchase date, item no. 10718
LANCOM Next Business Day Replacement option XL	In addition to the LANCOM Limited Lifetime Warranty replacement option for a defective device, item no. 61323
LANCOM service pack 24/7 XL *	The LANCOM Service Pack 24/7 Emergency Support offers end customers direct manufacturer support with a guaranteed initial response time of max. 30 minutes in the event of massive operational disruptions. Additional extended service times for concerns outside of emergency support (Monday to Friday, 8 a.m. to 6 p.m.). It also includes advance replacement in the event of a hardware defect, including delivery of a replacement device on the next working day. Available for 3 different terms: ➤ 1 year: 10233 ➤ 3 years: 10237 ➤ 5 years: 10241
LANCOM service pack 10/5 XL *	The LANCOM Service Pack 10/5 offers end customers direct manufacturer support for ten hours on five working days with a maximum initial response time of four hours. It also includes advance replacement in the event of a hardware defect, including delivery of a replacement device on the next working day. The following terms are available: ➤ 1 year: 10251 ➤ 3 years: 10252 ➤ 5 years: 10253
*) Note	Further details on LANCOM Service Packs are available at the following Internet address: https://www.lancom-systems.de/produkte/service-und-support
