

Building on the popularity of our CryoFuze Violet thermal paste, Cooler Master is adding more colors to the CryoFuze with CryoFuze 5. Featuring a multi-color, nanoparticle-based compound, CryoFuze 5 provides excellent thermal conductivity on all processing components. Its low thermal impedance greatly improves performance while a balanced viscosity and electrically insulated composition delivers exceptional bonding with effortless application and clean up. CryoFuze 5 is non-corrosive and oxidation resistant, leaving contact surfaces unharmed and preventing solidification and drying. CryoFuze 5 has a versatile range of temperature performance, maintaining stability from -50°C up to 240°C. Brighten up your cooling performance with CryoFuze 5.
