The GREY Edition series mouse pad is the perfect combination of functionality and comfort. A solid rubber base effectively prevents the pad from sliding, even during intense use. The high-quality surface material ensures smooth mouse movement. Carefully stitched edges guarantee durability and prevent fraying, thereby enhancing aesthetic appeal and lifespan.

A thickness of 2 mm (for size S) and 3 mm (for other sizes) provides comfort during use. The structure of the top layer of the pad works perfectly with all mouse sensors.

The mouse pad is easy to keep clean; it can be hand-washed at temperatures up to 40°C, using a delicate cleaning agent.
